 mickyclerkinoliver@gmail.com

I'm Micky, a Software Engineer with 7+ years of experience – spending most of my career working on internal platforms.

I've worked across many industries and technology stacks, working on everything from throwing together MVPs at startups to building systems with millions of daily users. My primary motivator is and always has been working on hard problems. I take pride in my work and have a strong sense of what it means to be a good engineer.

CURRENT ROLE

Confluent.io | Mar 2023 – Present

Senior Software Engineer II – Kubernetes Cloud Platform + Cloud Architecture + Reliability

- Implemented features in Go using Kubernetes native concepts, utilising CRDs to build simple abstractions of CSP complexity for our internal customers
- Improved company wide disaster recovery posture by providing storage backups as a service through platform abstractions
- Developed a remote configuration management system used across the fleet, allowing targeted, dynamic updates to customer configurations without restarts
- Operated and monitored issues across a large fleet of Kubernetes Clusters, spreading multiple CSPs and instance types – including GPU nodes. Abstracting cloud provider complexity from engineers and providing automated upgrades and scaling
- Uplifted our internal AI SRE Agent from proof of concept to a fully featured agentic runtime, assisting on-call engineers across the company with resolving incidents

PREVIOUS EXPERIENCE

Twitter | Apr 2022 – Jan 2023

Software Engineer II – Analytics

- Developed user-facing features end-to-end using React + Scala that provided richer analytics for ad campaigns as well as organic Tweets
- Maintained and extended large scale analytical pipelines running on Apache Mesos.

Checkout.com | Jan 2021 – May 2022

Software Engineer II – Payment Disputes

- Designed greenfield systems on AWS with .NET Core to ingest data from card schemes, allowing for improved reporting, data quality and automation
- Migrated our dispute resolution pipeline from manual operations to a scalable automated platform streaming messages over Kinesis and SQS

Push Doctor | Jun 2018 – Jan 2021

Software Engineer – NHS Consultations

- Worked in the NHS Squad, providing integrations with our in-app consultation to read and write patient notes and issue prescriptions in a secure manner
- Improved reliability by replacing a legacy system with real-time messaging using Redis and Websockets for mid-consultation messaging between patient and Doctor
